

Milestones	Week 1 (6-Apr)	Week 2 (13-Apr)	Week 3 (20-Apr)	Week 4 (27-Apr)	Week 5 (4-May)	Week 6 (11-17 May)	Week 7 (18-May)	Week 8 (25-May)	Week 9 (1-Jun)	Week 10 (8-June)	Week 11 (15-Jun)
Product Idea											
Designer Pitch											
VOC			Planning & Preliminary Results	Continue Qual & Quant Surveys/Interviews							
Developer Pitch			Design Mockups, Tech Requirements	Presentation							
Data sourcing for RAG				Finalise 1 exercise, find youtube, kaggle, instagram videos , research papers, tutorials, muscle names , images etc (20-30)							
Blueprint (User Flow/Screens)											
Design System				Share final version here with everyone	Icons/imagery						
Research 'Form' scientifically				Finalise exercise, Research biomechanics, how to compute user's angle, Good tips for taking videos for getting the best output from mediapipe	Define parameters 'Movement Quality', 'Stability', 'Posture', Rep Count, Rep time, Ideal angles						
Design Output				johnjinuidesigner@gmail.com Can u update this?	Initial design screen for dashboard (Tsion), profile (Why'et), and history/trends (John)	Subpages from the week 5	Onboarding/signup, workout planner screen	Prototype Screens for devs.			
Foundation /Infra Setup					GCP, S3 storage, React, Tailwind Setup,API Gateway Setup						
Upload Flow & RAG Retrieval, Form Analysis Output					Mediapipe (Python library) explore	Video pipeline, Mediapipe integration, RAG setup, Gemini API, RAG Phase 1 (Mediapipe, biomechanics data) , RAG Retrieval Accuracy, (Basic Prompt Engineering LLM					
Enhanced RAG , Database Setup & Form Analysis Refine					Dataschema for DB		RAG: Audio transcripts from form videos, research papers, images etc for more form reference Database: Exercise, weights, reps, past form videos & refine prompt engineering for form analysis results				

Form Comparison Results, Workout Builder & Track								Form Comparison Prompt Engineering, Exercise Builder and Track front end, save to DB			
Sample Videos (for testing)						Define scenarios, good/bad examples of sample videos (target 20-30) , front-end experience					
Performance, Accuracy & Validation for 1st Exercise									Accuracy Validating testing (Test 20- 30 videos) , Refine prompt/RAG accordingly , End to end latency/optimisa tion		
UAT & E2E Testing										UAT & End to end testing, Final pitch preparation
